508Qv

QUESTIONS FOR DISCUSSION

1. How can the present cotton surplus be disposed of?
2. Can we prevent future accumulations of cotton surpluses?
3. What is the prospect for domestic consumption -
 - a. During the war?
 - b. After the war?

Reserve

4. What are the possibilities of further expansion of domestic cotton consumption?
If certain costs or concessions are involved in the plans adopted, is it feasible to expect cotton farmers to bear this expense?
5. What are prospects for cotton exports -
 - a. During the war?
 - b. After the war?
6. What steps should be taken to recover normal exports after the war? Should cotton farmers be expected to bear the cost of such programs?
7. What is the outlook for cotton farmers' income and purchasing power for the goods of industry -
 - a. During the war?
 - b. After the war?
8. In the event domestic cotton prices are supported above world levels or above the level which might be expected with current supplies -
 - a. What effect is this likely to have on domestic consumption?
 - b. What effect might this have on rayon and staple fibre consumption?
 - c. What is likely to be the effect on the "lower order" uses for cotton, such as baggings and coverings for which substitutes like jute or paper might be used?
9. How much cotton can we expect to grow and dispose of annually?
10. (a) What types of cotton are most largely used domestically, and where is this cotton grown?
(b) What types of cotton have been most prevalent in loan stocks, and where is this cotton grown?
(c) If further adjustment in production should be needed, where should these adjustments be made, always keeping in mind:

1. What cotton can be sold most freely.
2. The human problem in areas making adjustments.
3. Alternative enterprises available in different areas.
